Section of
WorldFood Ukraine
international food
and drink exhibition

ORGANIZED BY PREMIER EXPO

PART OF THE ITE GROUP

WorldFood GreenProduce Ukraine is a dedicated platform for suppliers of technology and equipment for the production and processing of fresh fruit and vegetables.

Held within the framework of the country's main international food and drink tradeshow, the forum provides an opportunity to meet and conduct business with the region's growers and trade associations.

Why participate?

Meet the right buyers at the right time.

Strategically timed to target farmers free from harvesting; traders preparing for the holiday sales; and suppliers receiving orders for the next season.

Inter-industry promotion.

Co-located with WorldFood Ukraine, Animal Farming Ukraine, TransUkraine and InterStorage – the forum provides a one-stop-shop for buyers and suppliers involved in the production and sales cycle.
